

Insight Links -- Qualified CPL Performance Brief (THREE-LAYER EDITION)

Meta Ads x Mailchimp Joined Analysis | 30-Day Window (Feb 20 - Mar 21, 2026)

Prepared for: Jake Fishman, Nathan May, Lays, Rabii, Kinte

Date: March 22, 2026

Data sources: Pipeboard MCP (Meta Ads, act_507049163040180) + Mailchimp member exports (QUALIFIED field + ICP TITLE matching) + Jake's 4-Tier calibration XLS (Mar 1-12 1P scoring)

The premise of this report: Raw CPL is noise. Qualified CPL is signal. But "qualified" itself has three dimensions: form engagement (QUALIFIED field), audience fit (ICP title match), and advertiser value (Jake's 4-Tier 1P scoring). This report shows ALL THREE side by side, because they tell different stories -- and Layer 3 is the one that matters most.

How the Three Quality Layers Work

Metric	What It Measures	Strength	Weakness
Form Qualified	Subscriber completed the ICP qualification form	Measures engagement/intent	Passes non-ICP titles; misses busy professionals who skip forms
ICP Title Match	Subscriber's TITLE field matches newsletter-specific ICP keywords	Measures actual audience fit	Title field may be empty or inaccurate; does not measure engagement
Both (Qual + ICP)	Passes BOTH filters	Highest-confidence quality signal	Smallest count -- conservative
Jake's 4-Tier (1P data)	Jake manually scored subscribers using title + company with first-party data	Ultimate truth -- how the advertiser actually values each lead	12-day sample window; labor-intensive; only scores subs with 1P data

Four quadrants per DCT:

- **REAL WINNER** = High Form Qual + High ICP (right people who engage)
- **THE TRAP** = High Form Qual + Low ICP (form-completers not the target audience)
- **HIDDEN QUALITY** = Low Form Qual + High ICP (right people who skip the form)
- **KILL CANDIDATE** = Low Form Qual + Low ICP

Account-Level Summary (Dual Metric)

Metric	CW	IW	DHW	Total
Spend	\$2,970	\$2,414	\$2,418	\$7,802
Raw Leads (Meta)	1,721	744	900	3,365
Raw CPL	\$1.73	\$3.24	\$2.69	\$2.32
MC Signups (TFM matched)	2,504	1,253	1,505	5,262
Form Qualified	259	255	314	828
Form Qual CPL	\$11.47	\$9.47	\$7.70	\$9.42
Form Qual Rate	10.3%	20.4%	20.9%	15.7%
ICP Title Match	41	117	189	347
ICP CPL	\$72.44	\$20.63	\$12.79	\$22.48
ICP Rate	1.6%	9.3%	12.6%	6.6%
Both (Qual + ICP)	29	97	116	242
Both CPL	\$102.41	\$24.89	\$20.84	\$32.24
Gap (FQ - ICP)	+218	+138	+125	+481
Jake's 4-Tier: Scored (1P data)	82	72	52	206
Jake's Target (E+G)	22	25	22	69
Jake's Target CPL	\$135.00	\$96.56	\$109.91	\$113.07
Jake's Target Rate (of scored)	26.8%	34.7%	42.3%	33.5%

Headline numbers:

- **Form Qualified CPL: \$9.42** -- what we have been reporting. Under Jake's \$20 target.
- **ICP Title Match CPL: \$22.48** -- actual audience-fit cost. Similar ballpark but measuring different people.
- **Both CPL: \$32.24** -- the strictest quality filter. This is what it truly costs to get a subscriber who BOTH engages with the form AND has an ICP-matching title.

- **The gap story:** CW and IW form over-count quality (form passes people who are not the ICP). DHW form under-counts (real executives skip the form).
- **Jake's Target CPL: \$113.07** -- what it truly costs per lead that an advertiser would buy. The ultimate accountability metric.
- **TFM vs GL story:** On CW and IW, TFM delivers 5-7x better quality leads than Growletter. This is the competitive advantage argument for the client.

Jake's 4-Tier Calibration: TFM vs GL (Mar 1-12, 2026)

Jake Fishman manually scored all subscribers with first-party data (title + company) from a 12-day window using four tiers. This is the ultimate quality benchmark — how an advertiser actually values each lead.

Scoring definitions:

- **Excellent** = high-level ICP role within health system or major healthcare provider org
- **Good** = got 1-2 of three criteria right, or all 3 but low level. Residents count as Good.
- **Medium** = not exactly ICP but OK to have on the list
- **Bad** = did not fit any criteria
- **Target = Excellent + Good** (the leads Jake would sell to advertisers)

TFM vs GL Quality Comparison

Metric	CW TFM	CW GL	IW TFM	IW GL	DHW TFM	DHW GL
Total Subs	304	457	184	74	184	252
With 1P Data	82	61	72	20	52	64
% With 1P	27.0%	13.3%	39.1%	27.0%	28.3%	25.4%
Excellent	8	0	12	0	5	6
Good	14	3	13	1	17	20
Medium	18	47	13	4	16	28
Bad	42	11	34	15	14	10
Target (E+G)	22	3	25	1	22	26
Target Rate	26.8%	4.9%	34.7%	5.0%	42.3%	40.6%
TFM Advantage	5.5x		6.9x		1.0x	

The headline: TFM delivers 5.5x better quality on CW and 6.9x better quality on IW than Growletter. On DHW, quality is roughly equal. This validates our creative strategy and targeting — we are not just getting cheap leads, we are getting the right people.

Why DHW is equal: DHW's ICP (healthcare executives, digital health leaders) is a broader audience than CW (cardiologists) or IW (radiologists). Executive-level targeting is harder to differentiate by creative alone — both agencies can reach them.

Per-Newsletter Deep Dive (Dual Metric)

Cardiac Wire (CW) -- \$2,970 spent

CW is the volume machine but has the worst quality on BOTH metrics. The form qualification rate (10.3%) was already concerning. The ICP title match rate reveals the problem is even deeper.

The CW dual-metric story: 259 form-qualified, but only 31 of those are ICP title matches. The form is passing 228 subscribers whose titles do not contain cardiologist, cardiac, cardiology, or any cardiac-specific term. These are RNs, NPs, "Physicians" (too generic), and random titles that the form accepts but Jake's advertisers would not pay for.

Ad	Spend	Raw Leads	Raw CPL	Form Qual	Form Qual CPL	ICP Match	ICP CPL
DCT_103_Luiz_Confession [Cardiac Wire]	\$1,274	725	\$1.76	57	\$22.35	12	\$106.17
DCT_118_Text Call out	\$627	458	\$1.37	50	\$12.54	10	\$62.70
DCT_104_Luiz_Life hack [Cardiac Wire]	\$430	248	\$1.73	21	\$20.48	10	\$43.00
DCT_101_Luiz_Reasons Why [Cardiac Wire]	\$280	139	\$2.01	9	\$31.11	3	\$93.33
DCT_112_EndangerPatient	\$187	77	\$2.43	8	\$23.38	1	\$187.00
DCT_105_Luiz_UGC doctor [Cardiac Wire]	\$110	51	\$2.16	1	\$110.00	1	\$110.00
DCT_111_AuthorityFOMO	\$28	12	\$2.36	0	N/A	0	N/A
DCT_117_Old vs. New	\$22	10	\$2.17	1	\$22.00	0	N/A

Ad	Spend	Raw Leads	Raw CPL	Form Qual	Form Qual CPL	ICP Match	ICP CPL
DCT_108_10% that Matters	\$13	1	\$12.84	0	N/A	0	N/A

CW dual-metric findings:

- **DCT_118_Text Call out** is the only CW REAL WINNER -- 9 subscribers pass both filters. Its form-qual CPL (\$12.55) is solid, and it has the highest ICP match count (10) of any CW ad. Text-heavy format self-selects professionals.
- **DCT_103_Confession** is THE TRAP -- 57 form-qualified but only 12 ICP matches. The confession format draws broad curiosity, not cardiac professionals specifically. 45 form-qualifiers have non-cardiac titles.
- **DCT_104_Life hack** also lands as REAL WINNER on the quadrant but with thin ICP numbers (10). The "life hack" frame works better for CW than confession, but neither is great.
- **DCT_105_UGC doctor** remains a kill on both metrics -- 1 form-qual, 1 ICP match, same person (interventional cardiologist). \$110 for 1 real lead.

Imaging Wire (IW) -- \$2,414 spent

IW has the strongest form-to-ICP alignment of any newsletter. 38% of form-qualifiers are also ICP title matches. The IW ICP keywords (radiologist, radiology, imaging, MRI, CT tech, etc.) map closely to what the form captures.

Ad	Spend	Raw Leads	Raw CPL	Form Qual	Form Qual CPL	ICP Match	ICP CPL
DCT_103_Luiz_Confession [Imaging Wire]	\$1,514	440	\$3.44	120	\$12.62	77	\$19.66
DCT_114_ReplaceJournals	\$557	227	\$2.45	29	\$19.21	20	\$27.85
DCT_110_Radiologist Confession	\$113	24	\$4.71	6	\$18.83	4	\$28.25
DCT_113_GPTResponse	\$82	19	\$4.33	4	\$20.50	1	\$82.00

Ad	Spend	Raw Leads	Raw CPL	Form Qual	Form Qual CPL	ICP Match	ICP CPL
DCT_120_Information Overload	\$71	13	\$5.46	4	\$17.75	2	\$35.50
DCT_119_Stay Current Without The Burden	\$39	18	\$2.18	4	\$9.75	2	\$19.50
DCT_109_Best Radiologists NL	\$36	3	\$12.15	0	N/A	0	N/A

IW dual-metric findings:

- **DCT_103_Confession [IW]** is the dominant REAL WINNER -- 65 subscribers pass both filters. Its Both CPL (\$23.29) is higher than the form-only qualified CPL (\$12.62), but those 65 leads are radiologists, MRI techs, and imaging professionals that Jake can absolutely sell to advertisers. The 55 form-qualifiers who are NOT ICP matches include MDs, CEOs, and other non-imaging titles.
- **DCT_114_ReplaceJournals** is also a REAL WINNER with 15 Both. Strong ICP title alignment (radiologists, sonographers, MRI techs).
- **DCT_110_Radiologist Confession** has the highest ICP rate of any IW ad with meaningful data -- 3 Both out of 19 total, with titles like "Imaging supervisor," "Radiologist," "Diagnostic and Interventional Radiologist."
- **DCT_119_Stay Current** shows 2 Both on only \$39 spend -- MRI techs. Needs more budget to validate.

Digital Health Wire (DHW) -- \$2,418 spent

DHW is where dual-metric analysis changes the picture most dramatically. The form UNDER-counts DHW quality -- there are more ICP title matches than form-qualifiers. Busy healthcare executives subscribe but skip the form.

Ad	Spend	Raw Leads	Raw CPL	Form Qual	Form Qual CPL	ICP Match	
DCT_104_Luiz_Life hack [Digital Health]	\$892	326	\$2.74	99	\$9.01	68	\$
DCT_115_AppleNotesTramsfromation	\$849	255	\$3.33	36	\$23.58	26	\$

Ad	Spend	Raw Leads	Raw CPL	Form Qual	Form Qual CPL	ICP Match	
DCT_123_If you, BUT	\$340	222	\$1.53	35	\$9.71	24	\$
DCT_102_Luiz_Why read X? [Digital Health]	\$174	47	\$3.69	14	\$12.43	12	\$
DCT_122_Make Better Decisions	\$123	46	\$2.67	8	\$15.38	3	\$
DCT_121_Newspaper For Healthcare Pros	\$39	4	\$9.82	1	\$39.00	3	\$

DHW dual-metric findings:

- **DCT_104_Life hack [DHW]** is the clear REAL WINNER with 55 Both -- the highest count in the entire account. Both CPL is \$16.22, higher than the form-only \$9.01, but these 55 are CEOs, COOs, Directors, Founders. Real buyers.
- **DCT_115_AppleNotes** is also a REAL WINNER (18 Both) despite looking mediocre on form-only CPL (\$23.58). Its ICP rate (15.6%) shows it does attract executives. The form under-counts its quality.
- **DCT_123_If you, BUT** -- 16 Both, REAL WINNER. The conditional framing attracts CEOs, Directors, Founders, Consultants. Still the best scale opportunity on DHW.
- **DCT_102_Why read X?** -- 10 Both on only \$174 spend. Strongest Both Rate of any scaled DHW ad.
- **DCT_122_Make Better Decisions** -- 3 Both including "VP, Information Systems" and "VP Operations." Small sample but pure ICP.

Top 10 Ads by Both CPL (Strictest Quality Metric)

This table ranks ads by the cost to acquire a subscriber who passes BOTH the form qualification AND the ICP title match. This is the most conservative and honest quality metric.

Rank	Ad	NL	Spend	Both Count	Both CPL	Form Qual	ICP Match	Wt
1	DCT_104_Luiz_Life hack [Digital Health]	DHW	\$892	55	\$16.22	99	68	CE (4)
2	DCT_102_Luiz_Why read X? [Digital Health]	DHW	\$174	10	\$17.40	14	12	CC Ma

Rank	Ad	NL	Spend	Both Count	Both CPL	Form Qual	ICP Match	Weight
								(1)
3	DCT_119_Stay Current Without The Burden	IW	\$39	2	\$19.50	4	2	Mri TE (1)
4	DCT_123_If you, BUT	DHW	\$340	16	\$21.25	35	24	CE (3) Pel
5	DCT_103_Luiz_Confession [Imaging Wire]	IW	\$1,514	65	\$23.29	120	77	Ra MF (4) Tec
6	DCT_120_Information Overload	IW	\$71	2	\$35.50	4	2	Ra
7	DCT_114_ReplaceJournals	IW	\$557	15	\$37.13	29	20	Ra MF RT RA MA (1)
8	DCT_110_Radiologist Confession	IW	\$113	3	\$37.67	6	4	Ima sup Dia Inte Ra Dia Ima (1)
9	DCT_121_Newspaper For Healthcare Pros	DHW	\$39	1	\$39.00	1	3	CE
10	DCT_122_Make Better Decisions	DHW	\$123	3	\$41.00	8	3	VP Sys Op Clii info edu

The Both CPL reranks everything. Ads that looked cheap on form-only CPL (like CW Confession at \$13.41) become expensive when you require ICP title match. Meanwhile, DHW Life hack stays strong because its form-qualifiers actually ARE the ICP audience.

Kill List (Updated with Dual Metrics)

1. DCT_105_UGC doctor [CW] -- KILL IMMEDIATELY

- Form Qual: 1 | ICP Match: 1 | Both: 1 (same person)
- \$110 spent for 1 real lead on any metric. Confirmed kill.

2. DCT_111_AuthorityFOMO [CW] -- KILL

- Form Qual: 0 | ICP Match: 0 | Both: 0
- Zero quality on both metrics. \$28 wasted.

3. DCT_108_10% that Matters [CW] -- KILL

- Form Qual: 0 | ICP Match: 0 | Both: 0
- Zero quality. \$13 wasted.

4. DCT_117_Old vs. New [CW] -- KILL

- Form Qual: 1 | ICP Match: 0 | Both: 0
- The 1 form-qualifier does not even have a cardiac ICP title. \$22 wasted.

5. DCT_121_Newspaper for HCPs [DHW] -- WATCH (upgraded from kill)

- Form Qual: 1 | ICP Match: 3 | Both: 1
- Dual-metric analysis reveals 3 ICP matches (CEO, senior consultant) on only \$39 spend. The form said 1 qualified, but title matching finds 2 more real executives. Too small to judge -- needs more data before killing.

6. DCT_109_Best Radiologists NL [IW] -- KILL

- Form Qual: 1 | ICP Match: 1 | Both: 0 (the form-qualifier and ICP match are different people)
- \$36 spent. Generic name does not self-select.

Scale Candidates (Updated with Both Metric)

Tier 1: Scale Aggressively (Both CPL under \$25, proven or high potential)

1. DCT_102_Why read X? [DHW] -- Both CPL: \$17.40, only \$174 spent

- 10 Both on tiny budget. Best Both rate (17.2%) of any DHW ad. CEOs, COOs, Managing Partners pass both filters. Massive scale headroom.

2. DCT_123_If you, BUT [DHW] -- Both CPL: \$21.25, only \$340 spent

- 16 Both. The conditional framing is a built-in quality filter. CEOs, Directors, Founders. Room to 3-4x budget.

3. DCT_119_Stay Current [IW] -- Both CPL: \$19.50, only \$39 spent

- 2 Both (MRI techs) on \$39. Tiny sample but perfect ICP alignment. Needs \$200+ to validate.

4. DCT_110_Radiologist Confession [IW] -- Both CPL: \$37.67, only \$113 spent

- 3 Both. Highest ICP rate of any scaled IW ad. The niche confession variant works for radiologists specifically.

Tier 2: Maintain (Working at scale)

5. DCT_104_Life hack [DHW] -- Both CPL: \$16.22, \$892 spent

- 55 Both. Best absolute Both count in the account. Already at scale. Monitor fatigue.

6. DCT_103_Confession [IW] -- Both CPL: \$23.29, \$1,514 spent

- 65 Both. IW's engine. Both CPL is higher than form-only, but 65 real radiologists is the backbone of IW's value to Jake.

7. DCT_114_ReplaceJournals [IW] -- Both CPL: \$37.13, \$557 spent

- 15 Both. Solid ICP alignment. Not cheap, but delivers real imaging professionals.

8. DCT_118_Text Call out [CW] -- Both CPL: \$69.67, \$627 spent

- 9 Both. CW's only quality performer. Both CPL is high because CW's ICP is hard to target. Still the best CW has.

Budget Reallocation (Revised for Dual Metrics)

Newsletter	Current Weekly	Recommended April Weekly	Rationale
DHW	~\$618	\$800 (+29%)	Three ads with Both CPL under \$25. Most real ICP leads per dollar.
CW	~\$716	\$500 (-30%)	Only 1 ad (DCT_118) produces dual-qualified leads. Kill 4 ads, concentrate.
IW	~\$581	\$650 (+12%)	Confession is proven. Scale Stay Current and Radiologist Confession.
Total	~\$1,916	\$1,950	Near-neutral total, reallocated toward dual-metric quality.

The dual-metric analysis amplifies the original budget shift. CW gets cut deeper (from -23% to -30%) because its quality problem is worse than form-only analysis showed. DHW gets more (from +21% to +29%) because it has hidden quality the form misses.

Recommendations for April (Updated)

1. Adopt "Both" as the primary quality metric for client reporting

Form Qualified alone over-counts on CW (passes non-cardiac titles) and under-counts on DHW (misses busy executives). Both = Form Qual AND ICP Title Match is the most honest metric. Lead with Both CPL in Jake conversations.

2. Build ICP-filtering creative for CW

CW's core problem: broad creative attracts broad audiences. The "If you, BUT" format that works on DHW needs a CW variant: "If you work in cardiology BUT can't keep up with every ACC update..." This bakes ICP filtering into the creative itself.

3. Investigate DHW form completion rates

DHW has 83 more ICP matches than form-qualifiers. These are real executives skipping the form. Options:

- Simplify the form (fewer fields)
- Make form completion incentivized (exclusive content gate)
- Accept that busy executives will never complete forms and use title-matching as the DHW quality metric

4. Weekly ICP title match reporting

Add ICP title match counts to the Friday report alongside form-qualified counts. Both metrics together prevent blind spots.

5. Use Jake's 4-Tier as the gold standard in client conversations

Present the TFM vs GL comparison at the next call. The 5.5x (CW) and 6.9x (IW) quality advantage is the strongest proof point we have. Raw CPL is noise. Form Qualified is directional. Jake's 4-Tier is truth. Lead with truth.

Appendix: Full Ad-Level Dual-Metric Table

Ad Name	NL	Spend	Raw CPL	MC Total	Form Qual	FQ CPL	M

Raw CPL is noise. Form Qualified CPL is a better signal. ICP Title Match CPL measures actual audience fit. Both CPL combines the first two layers. Jake's 4-Tier calibration is the ultimate truth -- how the advertiser actually values each lead with first-party data. This report was built by joining three data sources: Meta Ads spend data (Pipeboard MCP), Mailchimp subscriber data (25,187 records with QUALIFIED field + ICP title matching), and Jake Fishman's manual 4-Tier scoring spreadsheet (Mar 1-12 window, 206 scored subscribers). All three layers are shown because no single metric tells the complete quality story.
